

1.0 Environmental Policy Statement

Quest Waste Management Ltd, the Directors, and employees recognise the importance of environmental protection. This will include prevention of pollution.

This goal will be achieved at all levels within operations through the assessment of the environmental impact of activities, products and services and any necessary re-mediation.

The setting of environmental objectives and targets will provide the framework upon which Company environmental performance may be evaluated. Also, the Company its directors are committed to continual improvement and the prevention of pollution, including procedures, where appropriate, to ensure they exceed compliance with relevant environmental legislation, regulations and other industry specific requirements.

The Company, its Directors and Management, acknowledge that the efficient use of energy and raw materials are major issues to be considered within its activities as well as the conscious disposal and removal of its waste. Therefore, it is part of Company policy to pay specific attention to these matters in order to reduce the loss of natural resources and also to promote the efficient use of resources and appropriate maintenance of related equipment. Such actions will directly affect the design process and will take environmental considerations into account. The use of renewable sources of energy will be considered where it is appropriate to do so.

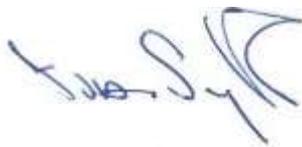

The prevention of environmental incidents is an important consideration and suitable training will be given to all employees to ensure the Company's work activities are inherently safe in the use for which they are designed and also in the environmental context.

The Company will foster environmental awareness and understanding in all its employees, suppliers, customers, sub-contractors and the general public.

This policy will be reviewed and updated as necessary from time to time and communicated to all employees. It will be available to the public and any interested parties on request.

Ivan Smyth

Managing Director

Quest Waste Management Ltd

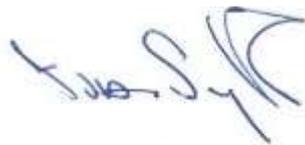

All Quest Waste Management Ltd personnel are required to work in an environmentally responsible manner so as to minimise disturbance to, and enhance where possible the natural environment and neighbours who may be affected by our work activities.

All employees should:

- Protect the environment by preventing or mitigating adverse environmental impacts
- mitigate the potential adverse effect of environmental conditions on the Quest Waste Management
- assist Quest in the fulfilment of compliance obligations
- enhance environmental performance;
- control or influence the way Quest Waste Management's products and services are designed, manufactured, distributed, consumed and disposed by using a life cycle perspective that can prevent environmental impacts from being unintentionally shifted elsewhere within the life cycle
- achieving financial and operational benefits that can result from implementing environmentally sound alternatives that strengthen Quest Waste Management's market position;
- communicate environmental information to relevant interested parties
- Understand Quest Waste Management Environmental policy
- Set an example by using environmental control equipment when and where necessary
